

Professional Propagation System

Become a master propagator overnight with this micro-climate controlled system. It works equally well with seeds or cuttings, with a maximum capacity of 412 starts. We recommend keeping the relative humidity at 70%. The pumping system provides optimal aeration, and an adjustable reservoir heater maintains nutrient temperature at 70° F.

Professional Propagation System PRO 173150

Includes: 2' x 4' x 6" propagation tray; 2' x 4' x 6" clear lid with humidistat and fan for humidity control; 20 gallon reservoir; Maxi-Jet 500 submersible pump at 66 gph; SB811C timer; 150-watt reservoir heater; 4 Oasis Wedge System trays with media; ebb and flow hose assembly; .4 oz. Rootone; 1 lb. Golden Grow; and complete instructions.

Featuring our exclusive automatic humidistat controller!
